

Local sparse-feature approximation

Prompt corpora

Addition, capitals,
and SI units

MLP activations

1,000 final-
token vectors
at seven layers

Layerwise SAEs

8,192-latent
independent
dictionaries

Contrast graph

Rank local effects
on $J = \ell_t - \ell_c$

Causal tests

Inhibition, activation
swaps, and controls

Sparse feature
inhibition or swap

Complete latent
swap

Raw MLP patch or
component
knockout
